Jan Bielecki (1994 - ?)

Senior Full Stack Developer at Ørsted (2023 - ?)

Jan Bielecki (1994 - ?)

"Any sufficiently advanced technology is indistinguishable from magic." ~ Arthur C. Clarke

Jan Bielecki (1994 - ?)

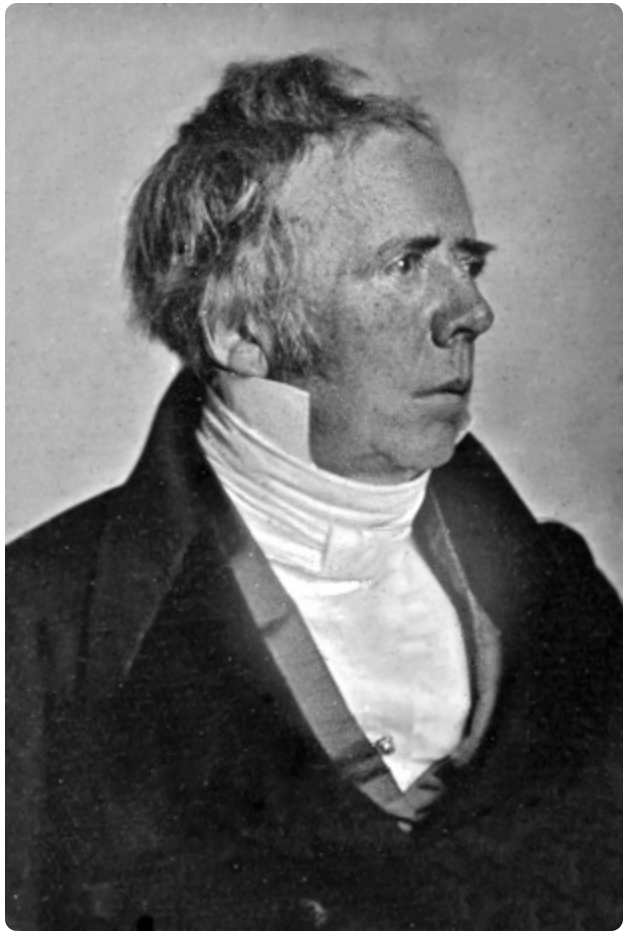

Running, Calistenics, Ping-pong, Foosball, Trekking, Snowboarding

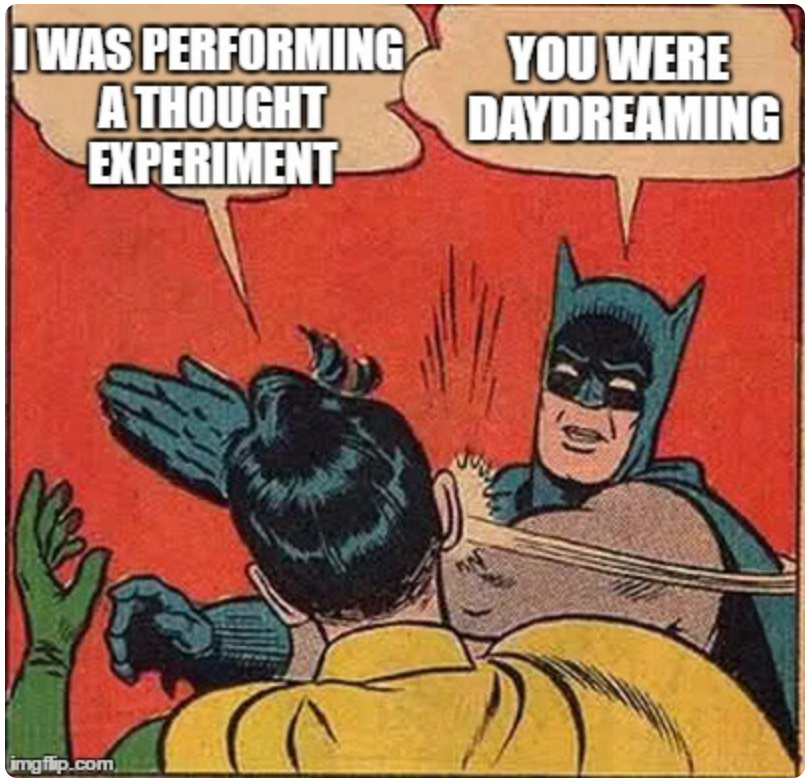

Hans Christian Ørsted (1777 - 1851)

Close friend of a Hans Christian Andersen (1805 - 1875), author of many fairy tales, including "The Little Mermaid" and "The Ugly Duckling")

Hans Christian Ørsted (1777 - 1851)

First to explicitly describe and name the "thought experiment"

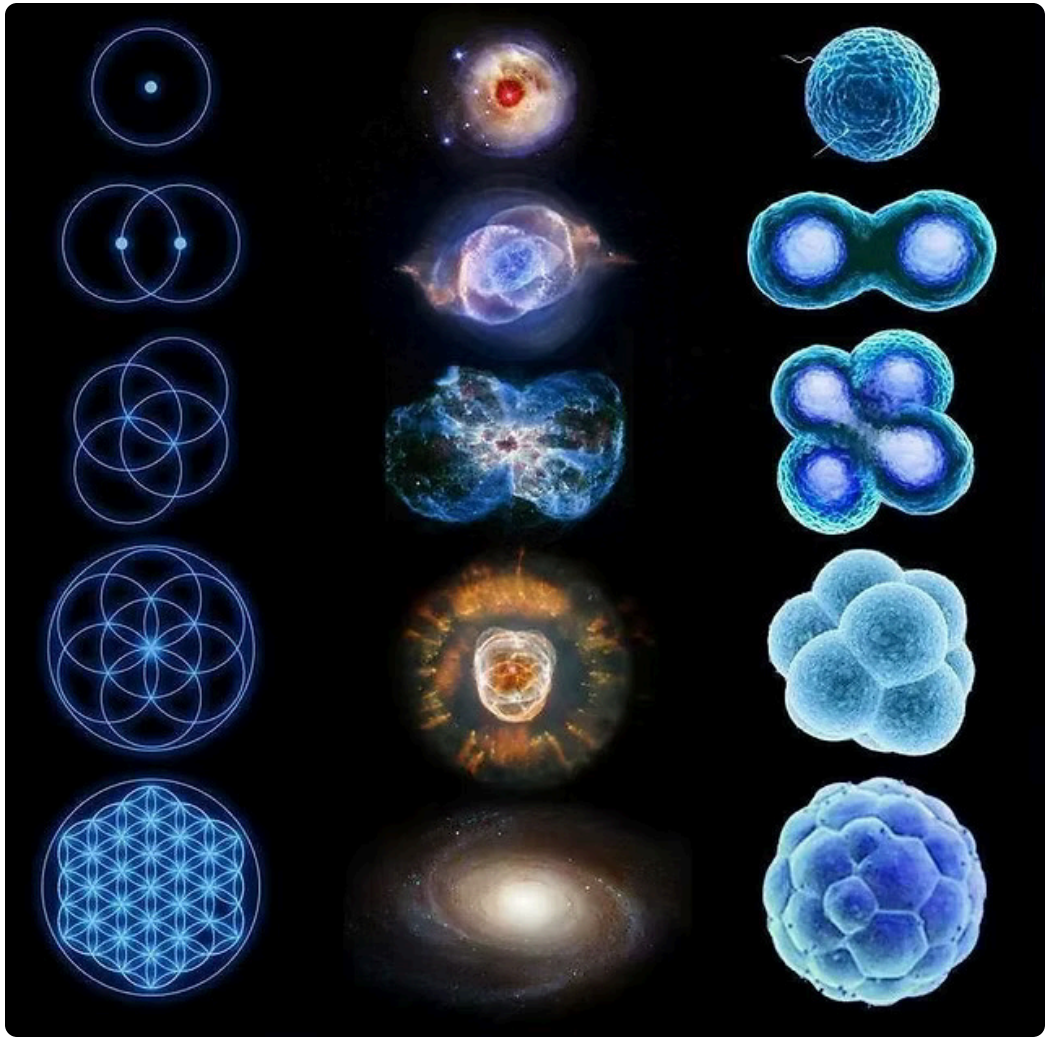

Hans Christian Ørsted (1777 - 1851)

In 1820, Ørsted published his discovery that a compass needle was deflected from magnetic north by a nearby electric current, confirming a direct relationship between electricity and magnetism.

Definitions as "patterns in the universe"

Patterns in math, astronomy, biology.

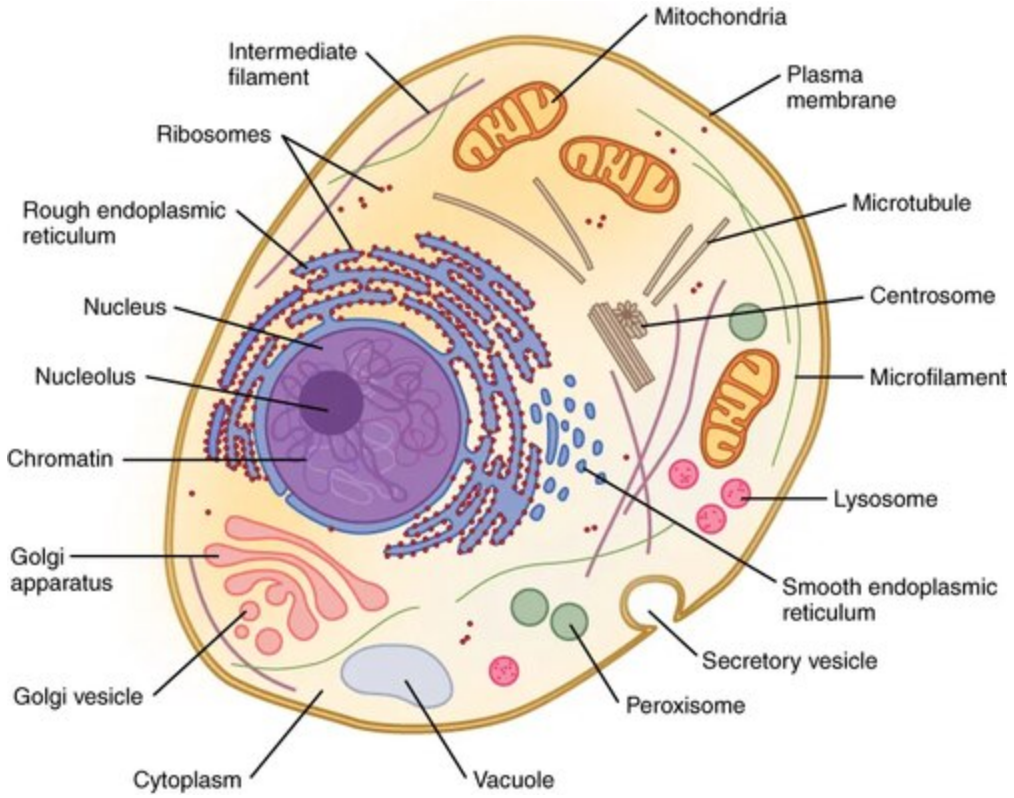

Definitions as "patterns in the universe"

A software design pattern.

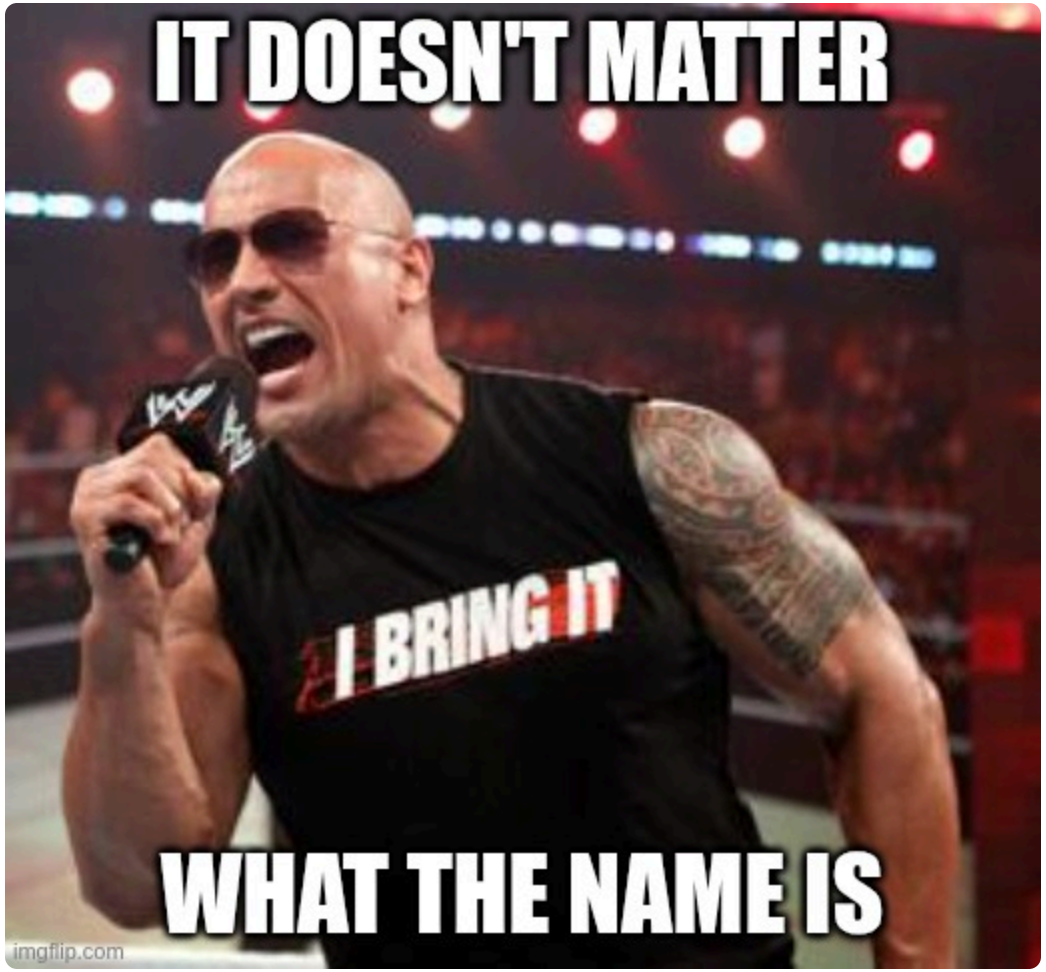

R: https://thecodinggopher.substack.com/p/the-adapter-design-pattern

The theory of acyclic references in terminology

The exercise is to describe mitochondria without referring to the cell.

Naming is irrelevant

Naming does not matter, or at least is a secondary concern.

Languages are ambiguous

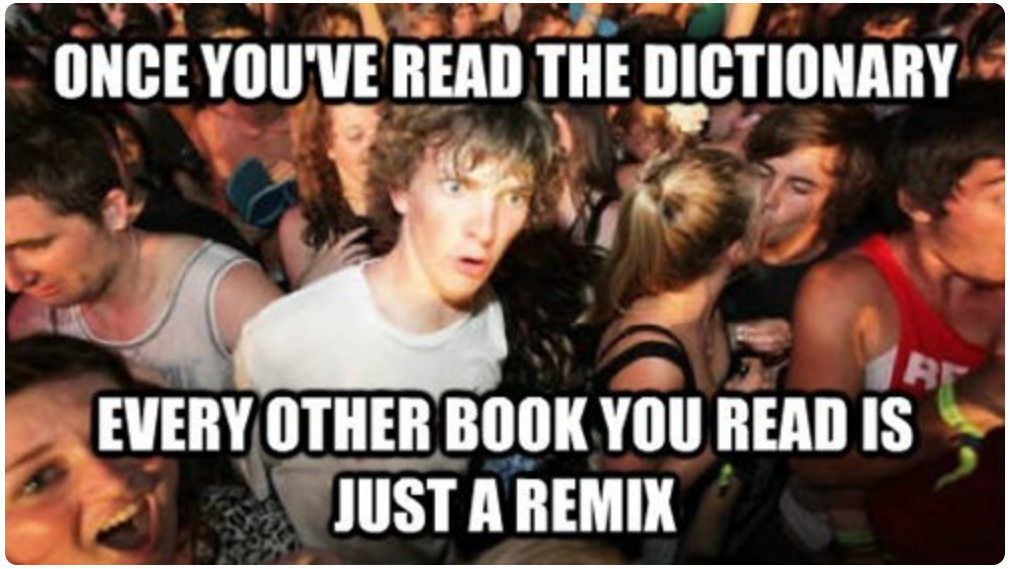

Even single words can have different meanings.

An experiment to "prove the theory"

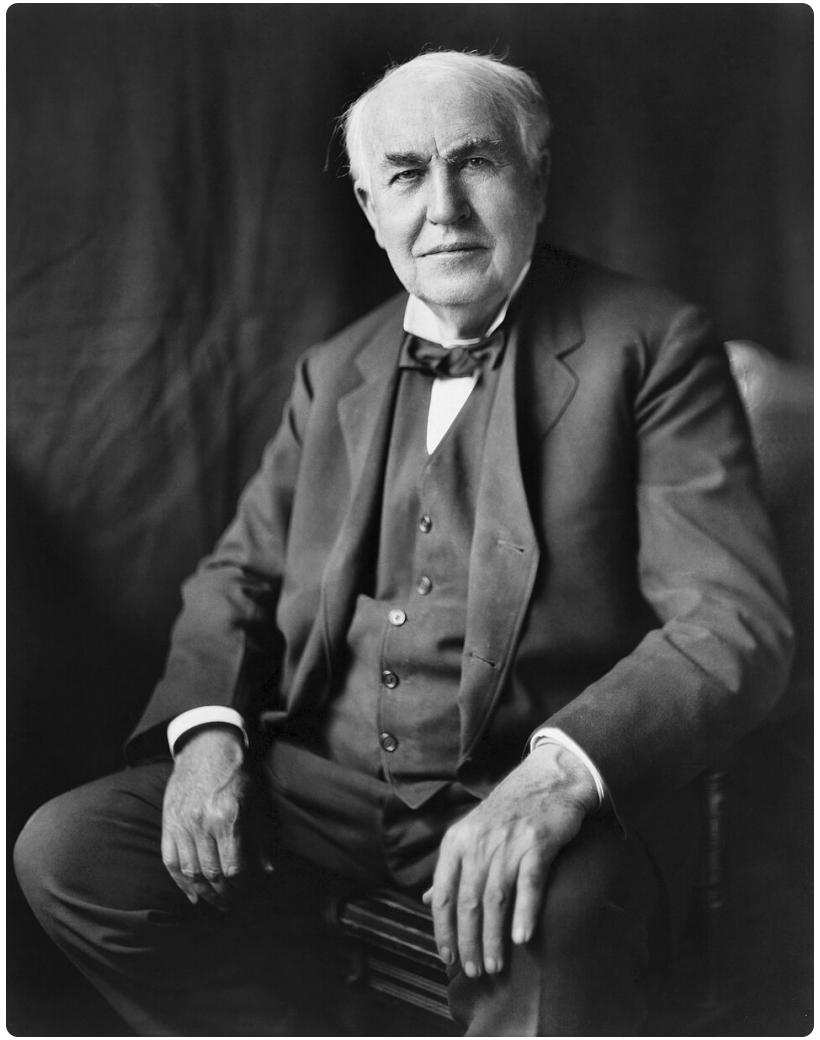

"In theory, there is no difference between theory and practice. But in practice, there is." ~ Benjamin Brewster

Standardized glossary in computing

A glossary is a focused collection of SPECIALIZED terms and DEFINITIONS tied to a SPECIFIC SUBJECT, book, or document.

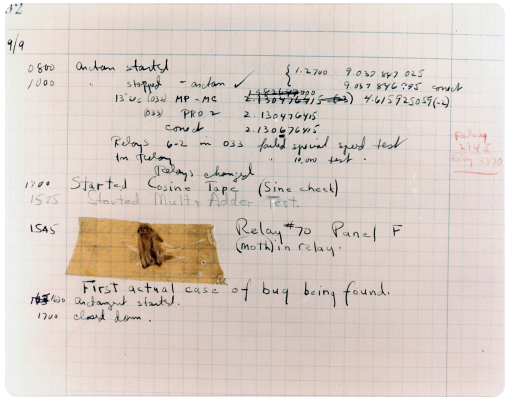

Thomas Edison (1847 - 1931)

"Bugs" - little faults and difficulties

Grace Hopper (1906 - 1992)

Similarly, the term debugging was used in aeronautics before entering the world of computers. A letter from J. Robert Oppenheimer, director of the WWII atomic bomb Manhattan Project at Los Alamos, used the term in a letter to Dr. Ernest Lawrence at UC Berkeley, dated October 27, 1944,[2] regarding the recruitment of additional technical staff. The Oxford English Dictionary entry for debug uses the term debugging in reference to airplane engine testing in a 1945 article in the Journal of the Royal Aeronautical Society. An article in "Airforce" (June 1945 p. 50) refers to debugging aircraft cameras.

"First actual case of bug being found"

Grace Hopper (1906 - 1992)

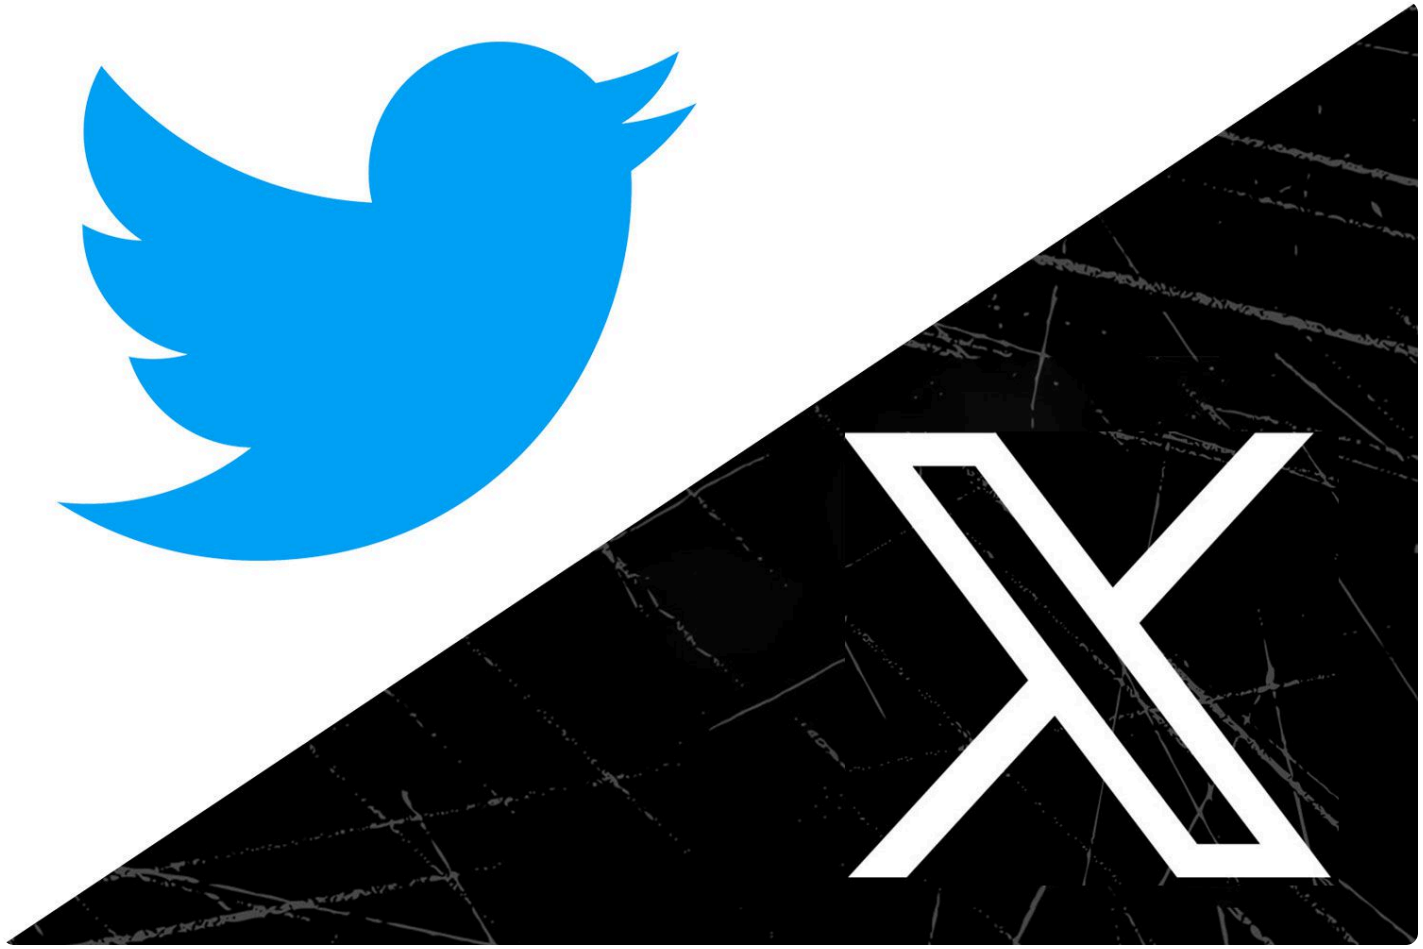

"First Glossary of Programming Terminology"

Eugen Wüster (1898 - 1977)

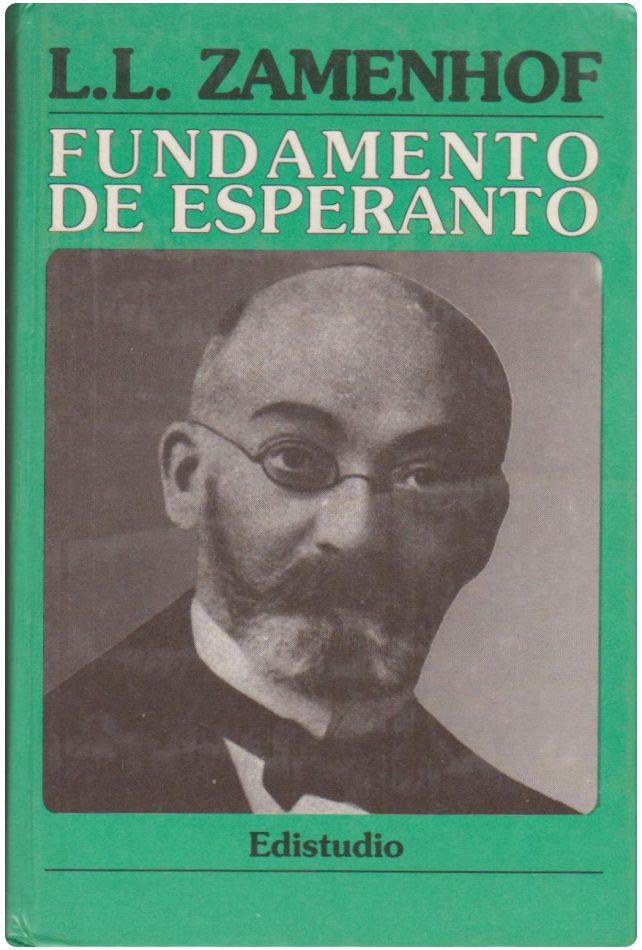

Eugen Wüster is often recognized as the founder of terminology.

Eugen Wüster (1898 - 1977)

Concepts (or definitions) exist even before they are named - thus naming and it relevance for the terminology field have been neglected."

Ludwik Zamenhof (1859 - 1917)

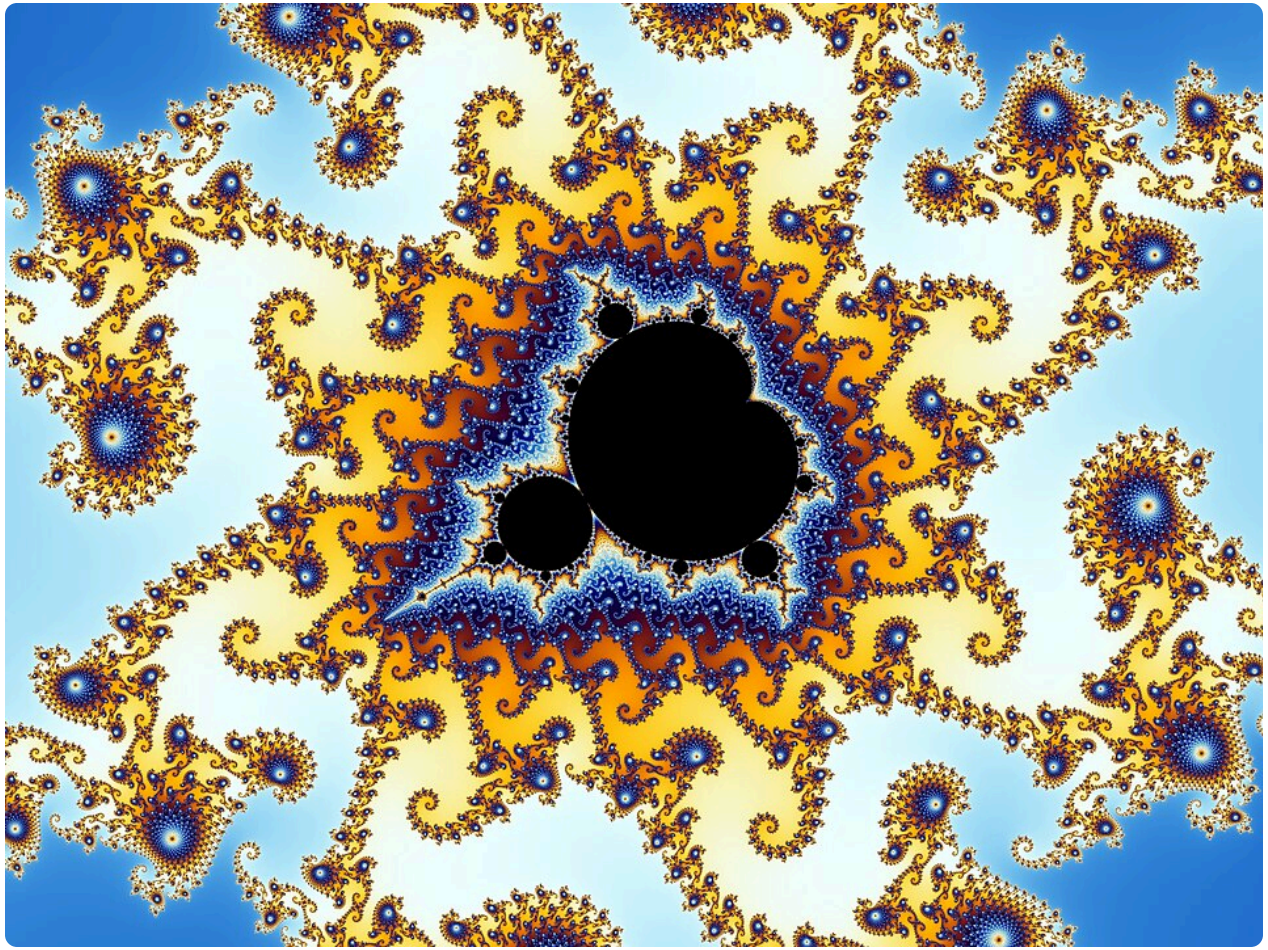

Wüster was a staunch advocate of a single language for scientific and technical communication.

Philosophy of definitions

Bertrand Russell

Logical atomism

Mandelbrot set

Mandelbrot Set, being indisputably complex, uses a simple recursive equation: \(z_{n+1} = z_n^2 + c\), starting with $z_0 = 0$.

Conway's Game of Life

Organized hierarchies in Dictionaries
