DefinITely, the most boring learning content you will ever see!

Jan Bielecki, PyCon Wrocław 2026

Intro

More Philosophy than Python

Learning platform based on DefinIT project

k4liber.github.io/definit-dsa

Learning platform based on DefinIT project

"Perfection is achieved, not when there is nothing more to add, but when there is nothing left to take away." ~ Antoine de Saint-Exupéry

Demo

Nobody:

Bugs right before a demo:

About me

Jan Bielecki (1994 - ?)

Senior Full Stack Developer at Ørsted (2023 - ?)

Jan Bielecki (1994 - ?)

"Any sufficiently advanced technology is indistinguishable from magic." ~ Arthur C. Clarke

Jan Bielecki (1994 - ?)

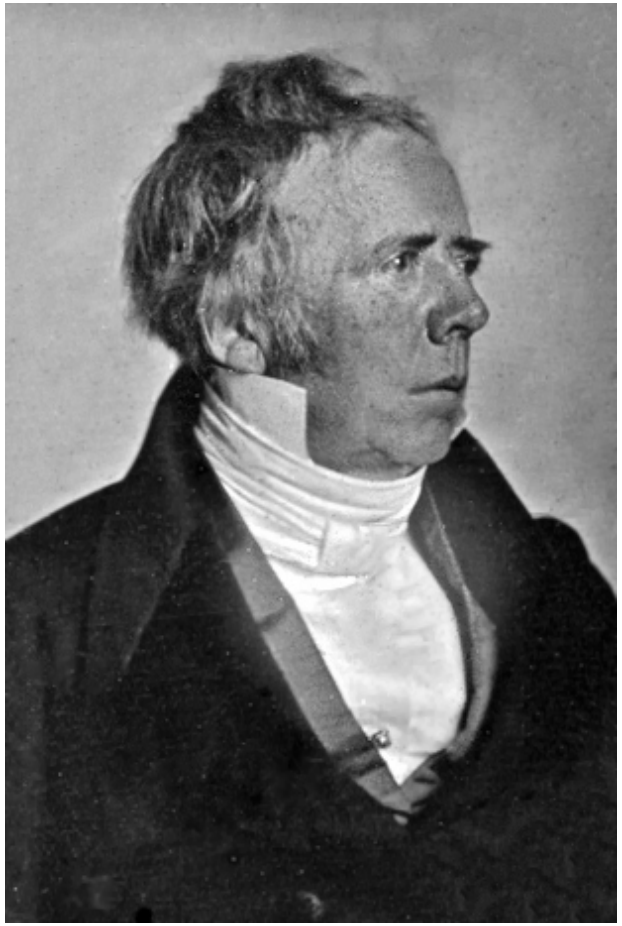

Running, Calistenics, Ping-pong, Foosball, Trekking, Snowboarding

About Ørsted

Hans Christian Ørsted (1777 - 1851)

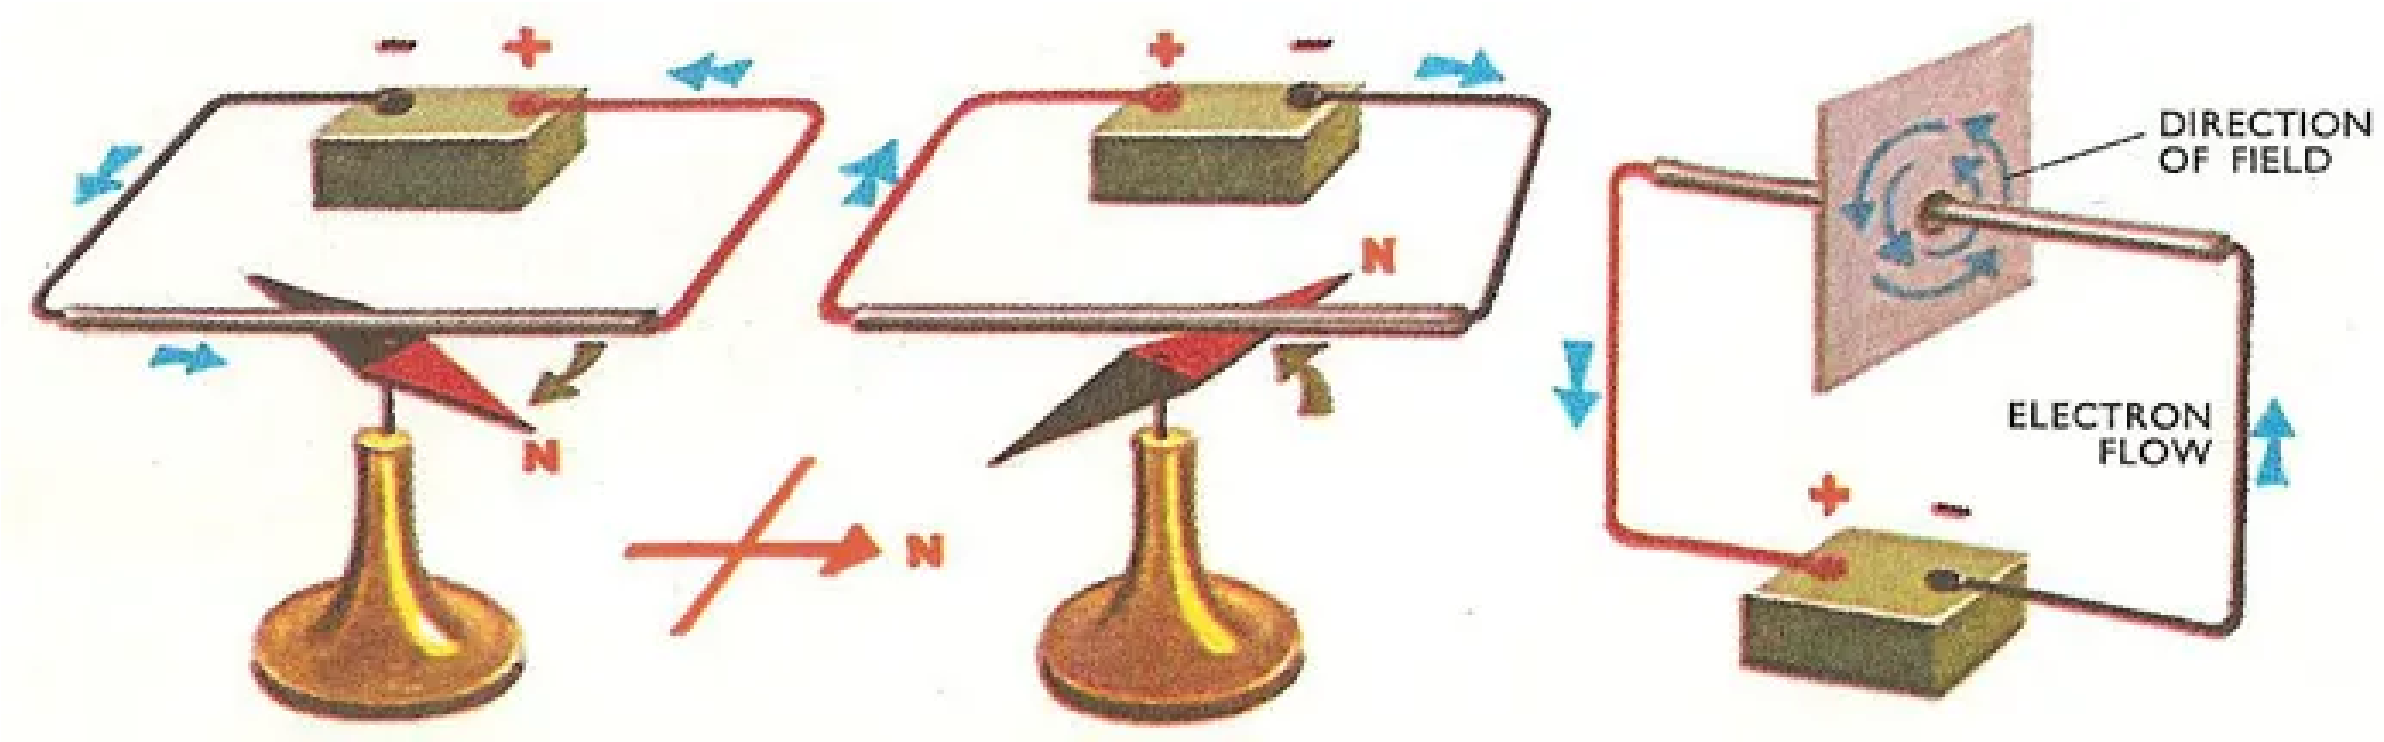

Close friend of a Hans Christian Andersen (1805 - 1875), author of many fairy tales, including "The Little Mermaid" and "The Ugly Duckling")

Hans Christian Ørsted (1777 - 1851)

First to explicitly describe and name the "thought experiment"

Hans Christian Ørsted (1777 - 1851)

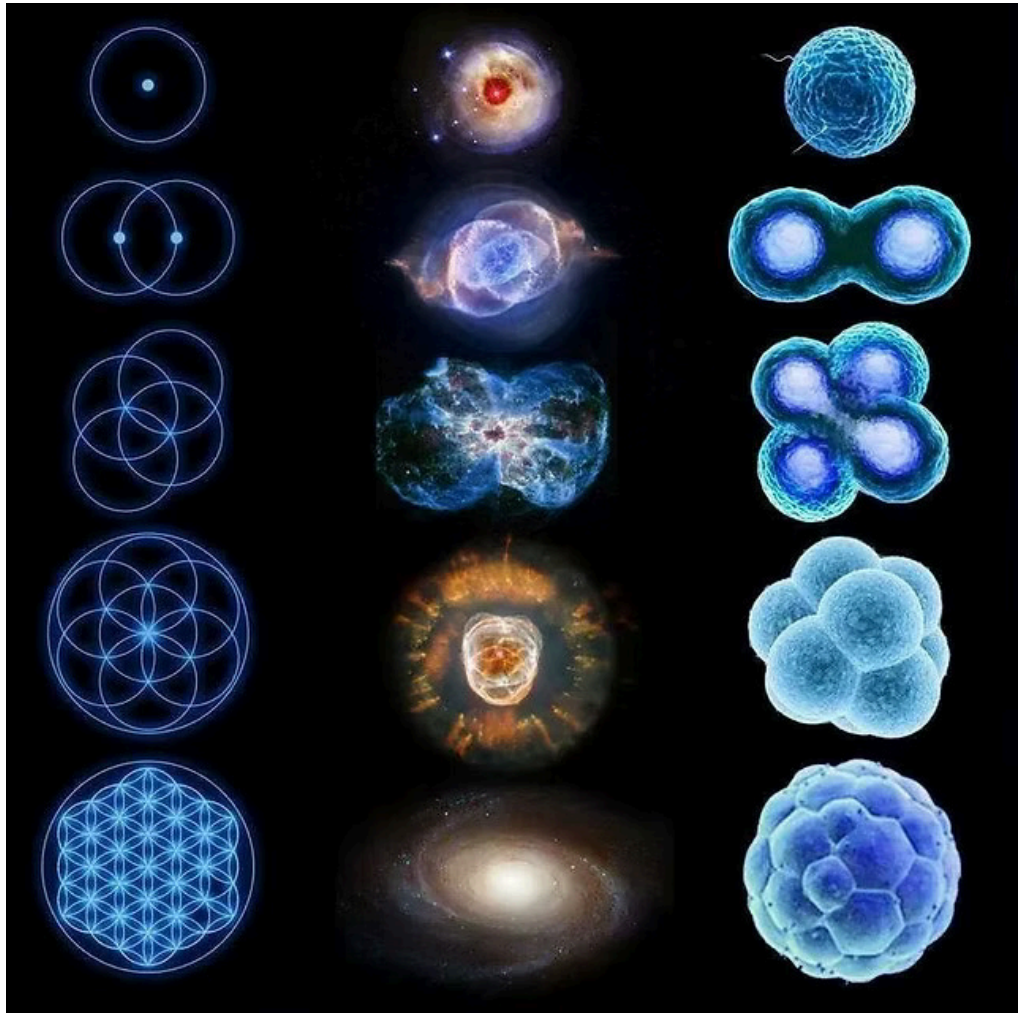

In 1820, Ørsted published his discovery that a compass needle was deflected from magnetic north by a nearby electric current, confirming a direct relationship between electricity and magnetism.

DefinIT philosophy

Definitions as "patterns in the universe"

Patterns in math, astronomy, biology.

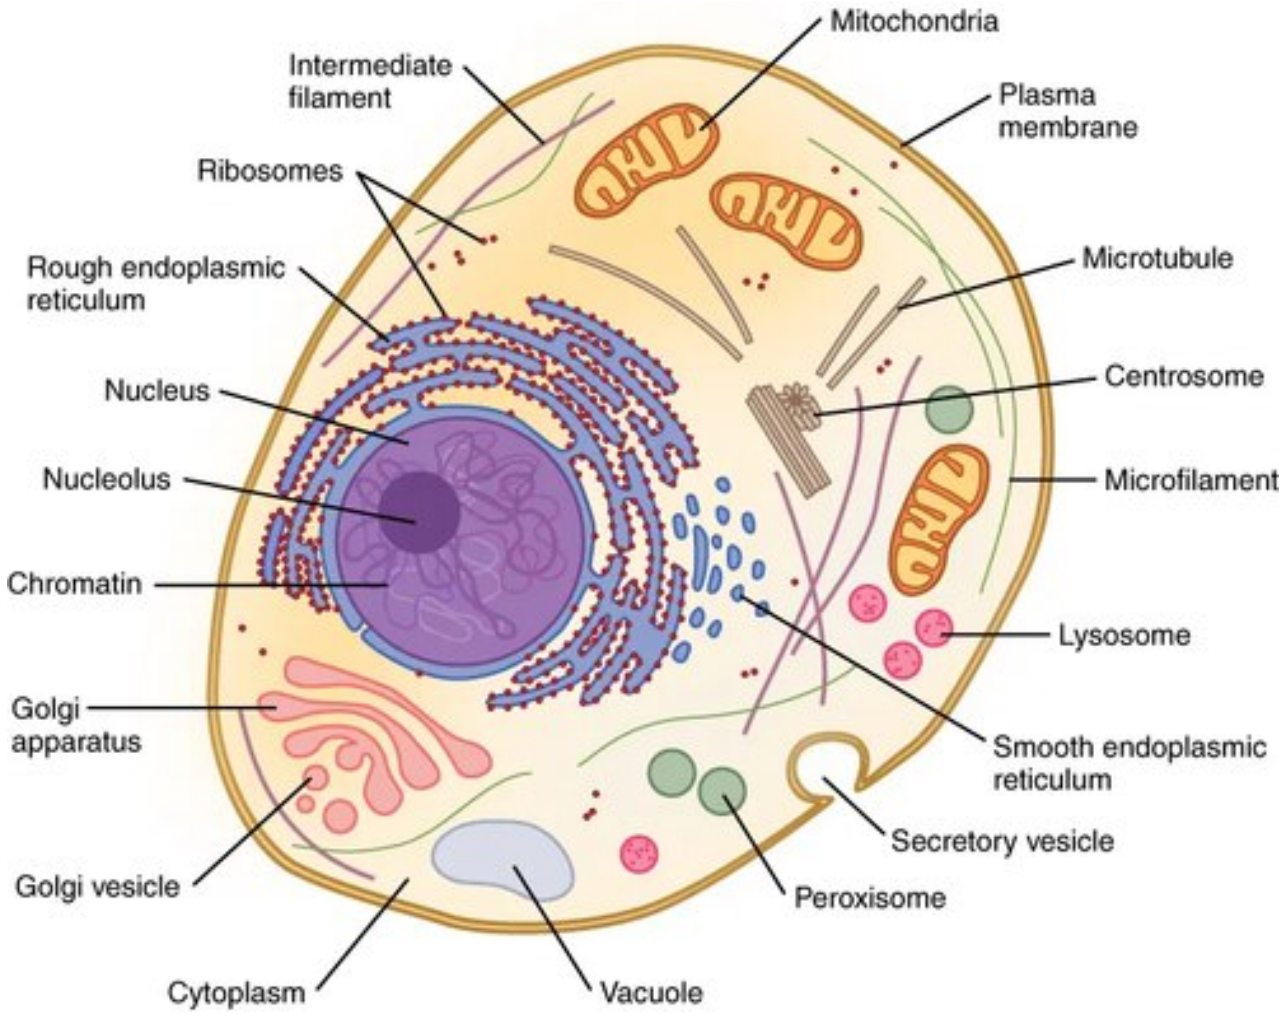

Definitions as "patterns in the universe"

A software design pattern.

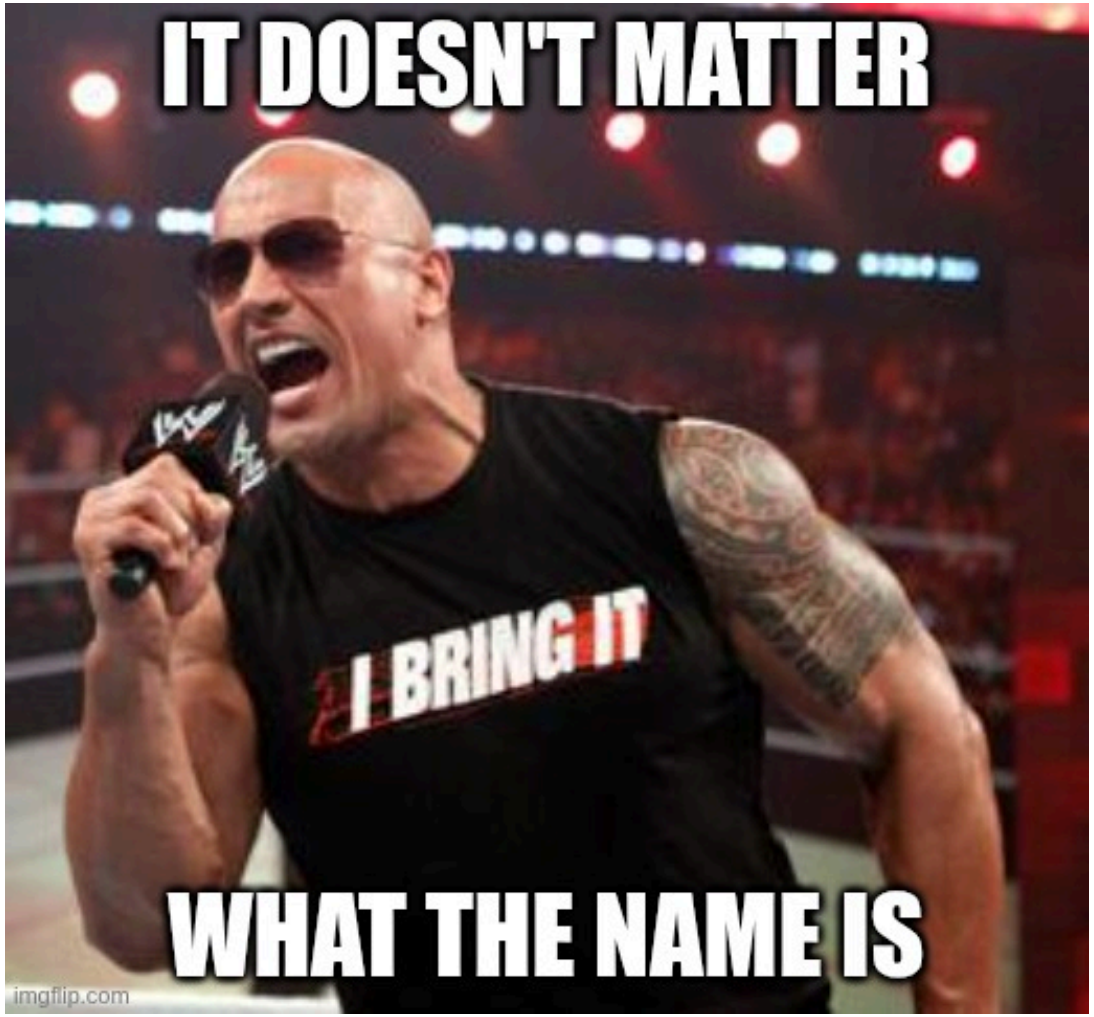

https://thecodinggopher.substack.com/p/the-adapter-design-pattern

The theory of acyclic references in terminology

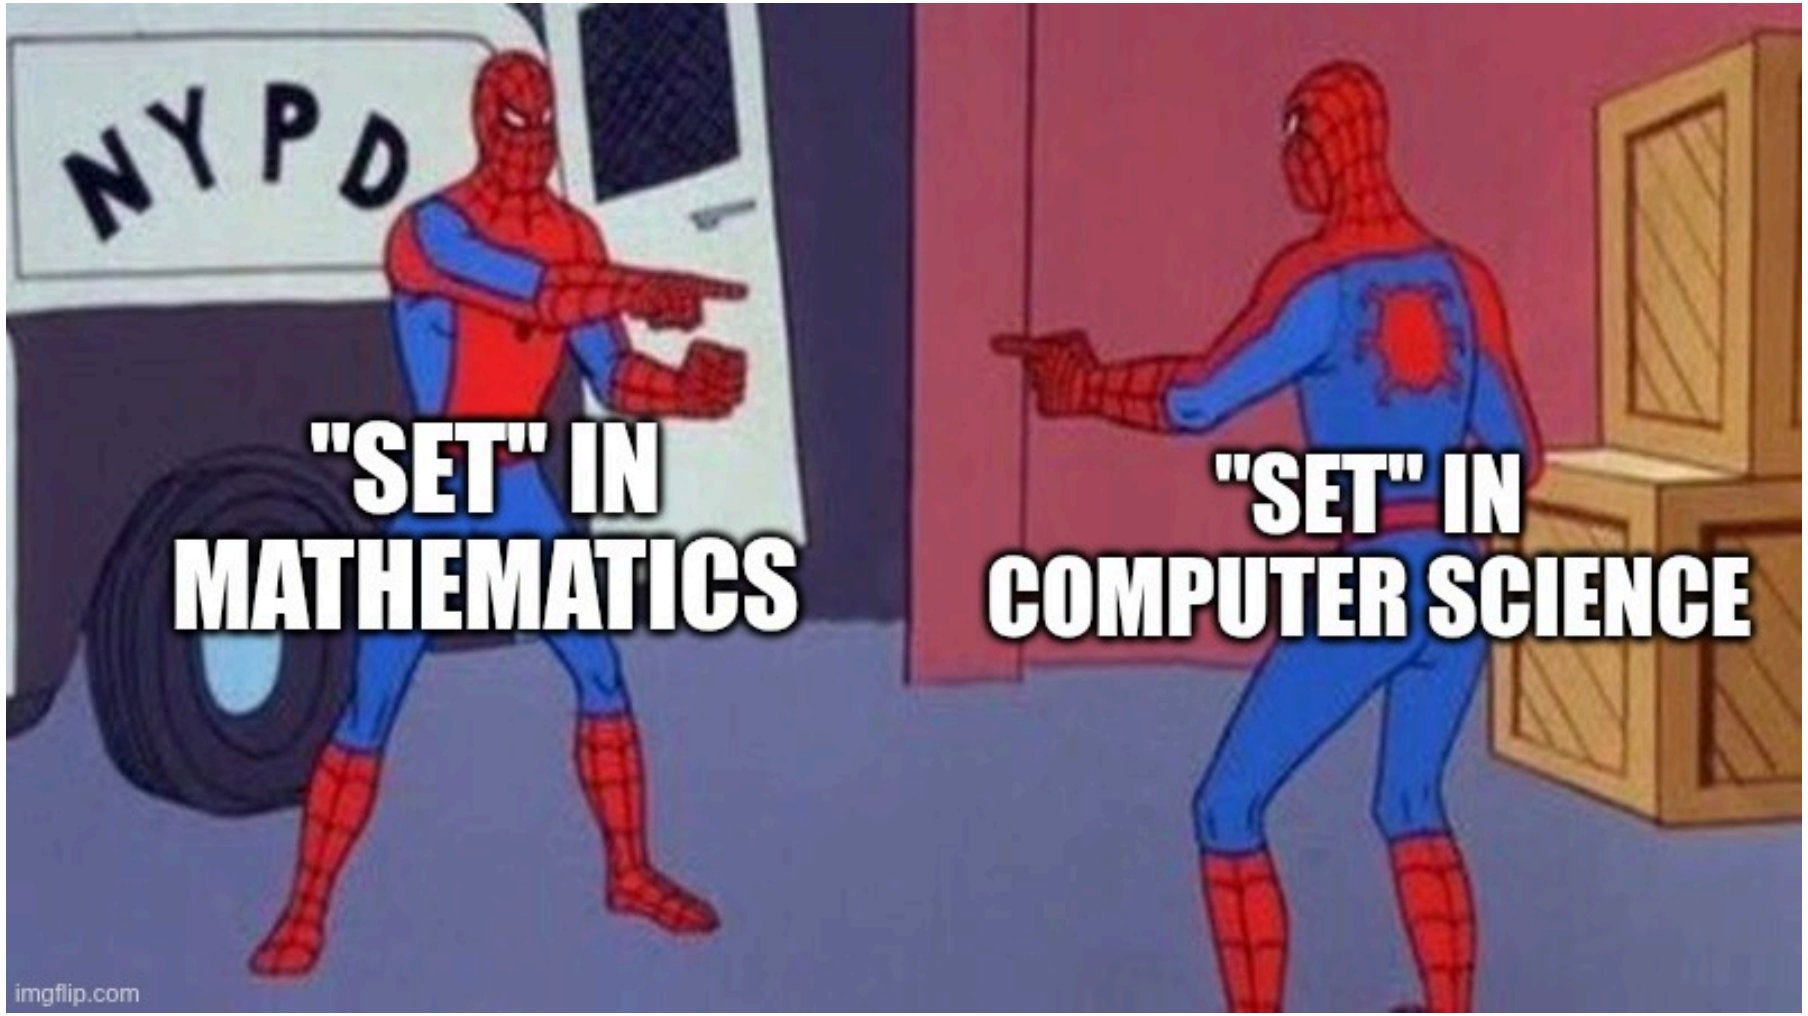

The exercise is to describe mitochondria without referring to the cell.

Naming is irrelevant

Naming does not matter, or at least is a secondary concern.

Languages are ambiguous

Even single words can have different meanings.

An experiment to "prove the theory"

"In theory, there is no difference between theory and practice. But in practice, there is." ~ Benjamin Brewster

Literature review

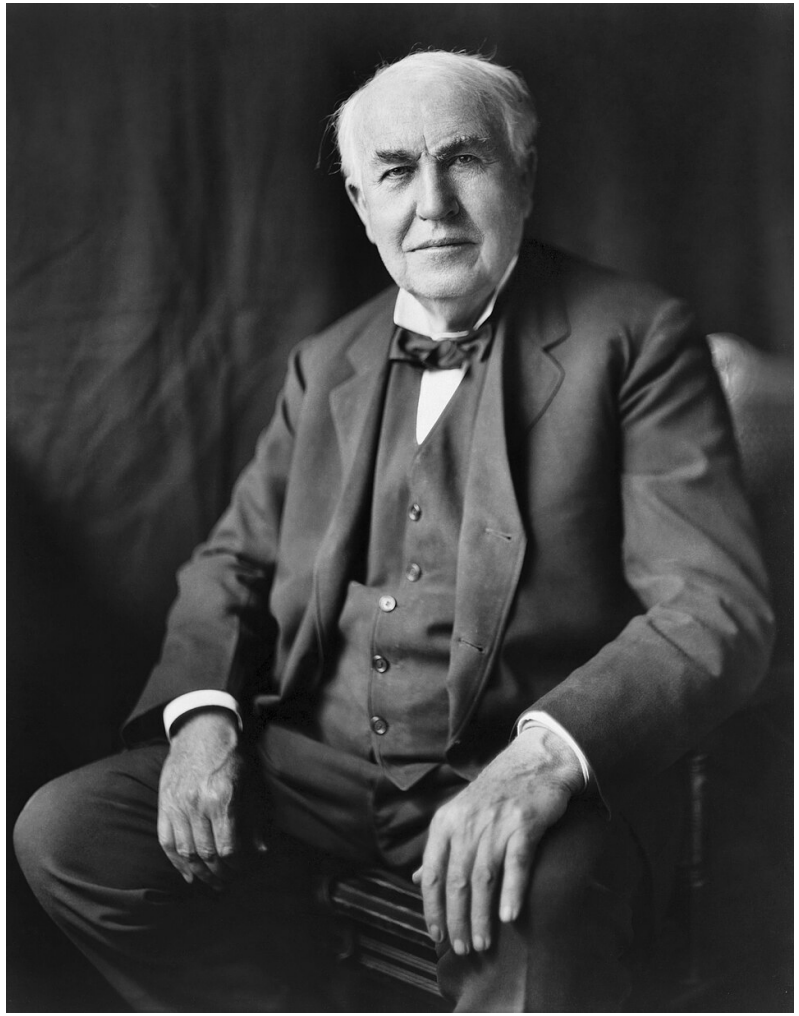

Standardized glossary in computing

A glossary is a focused collection of SPECIALIZED terms and DEFINITIONS tied to a SPECIFIC SUBJECT, book, or document.

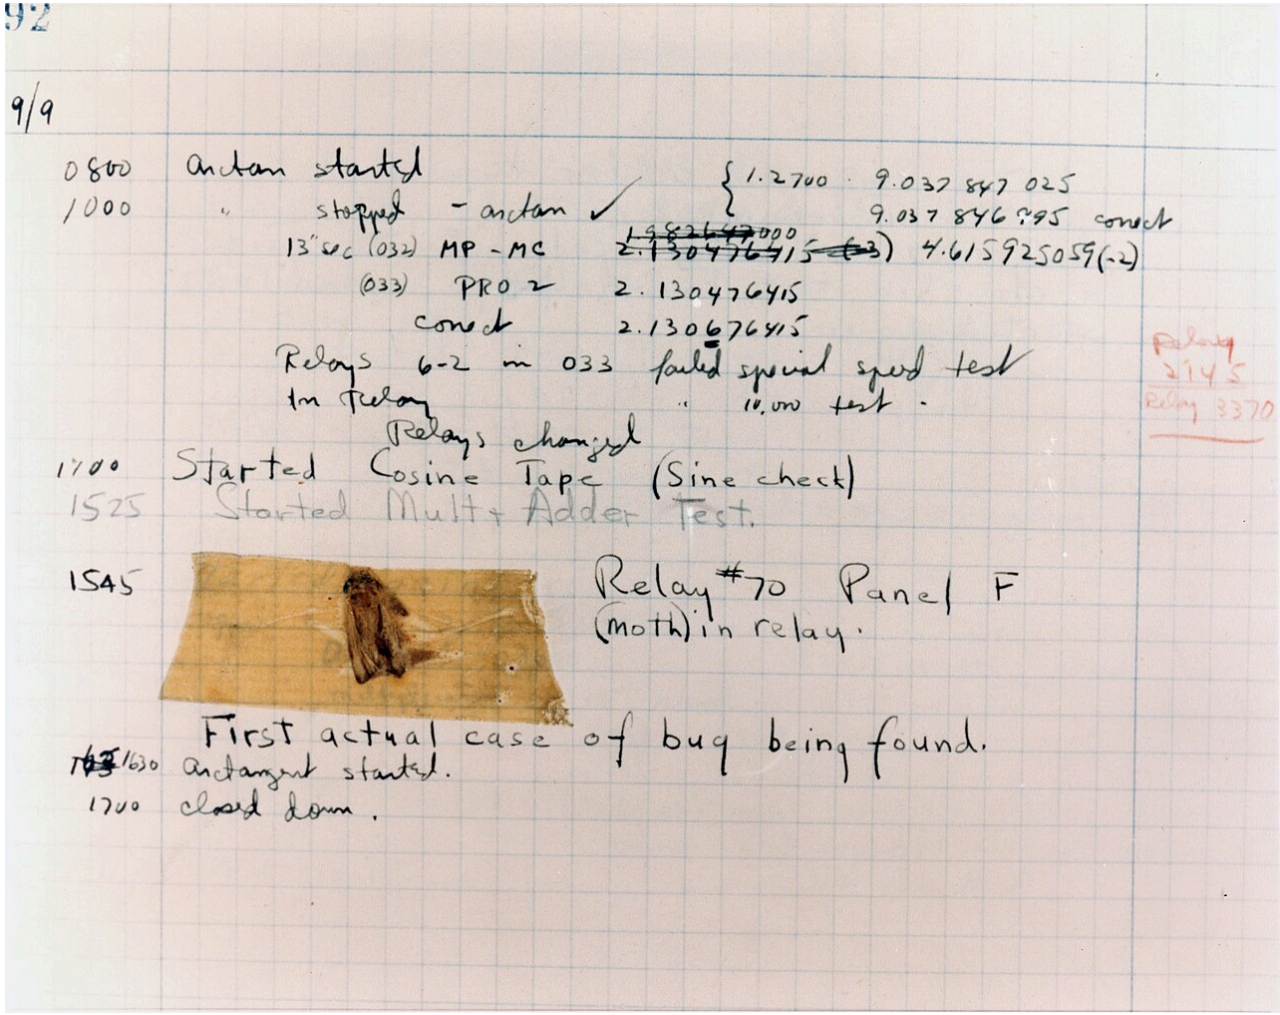

https://dataedo.com/cartoon/glossary-or-dictionary

Thomas Edison (1847 - 1931)

"Bugs" - little faults and difficulties

Grace Hopper (1906 - 1992)

"First actual case of bug being found"

Grace Hopper (1906 - 1992)

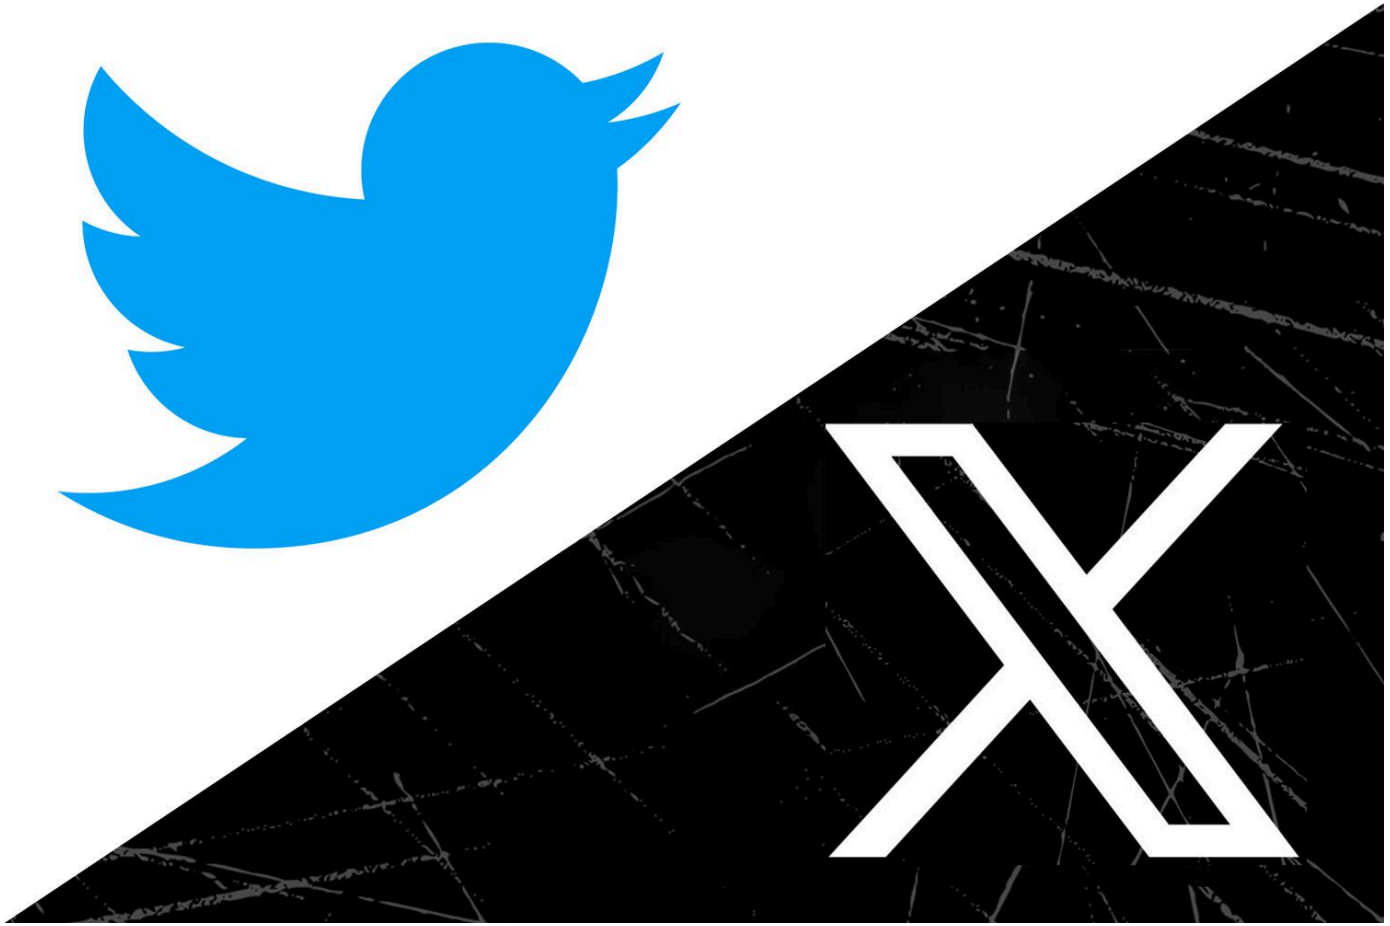

"First Glossary of Programming Terminology"

Eugen Wüster (1898 - 1977)

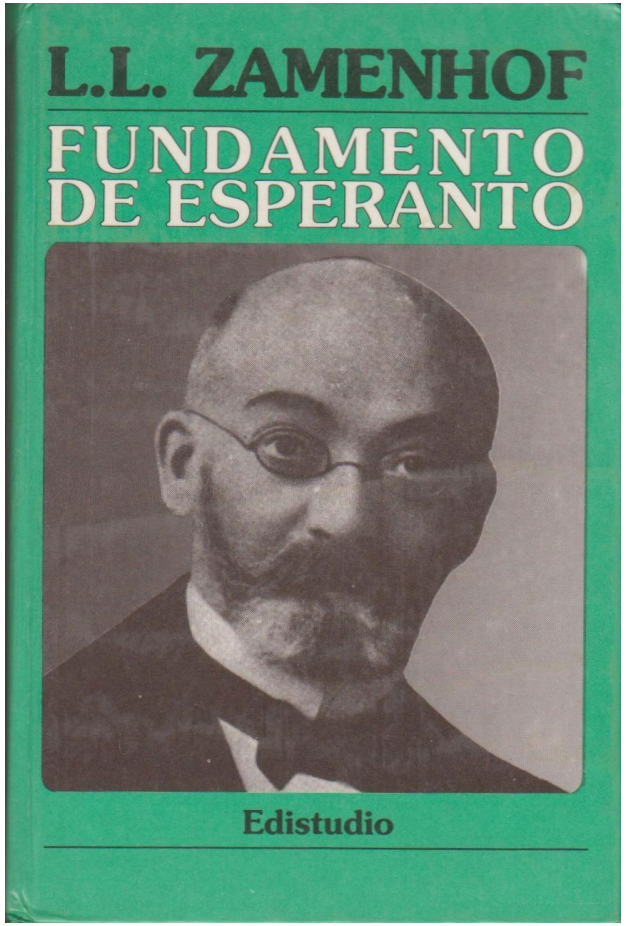

Eugen Wüster is often recognized as the founder of terminology.

Eugen Wüster (1898 - 1977)

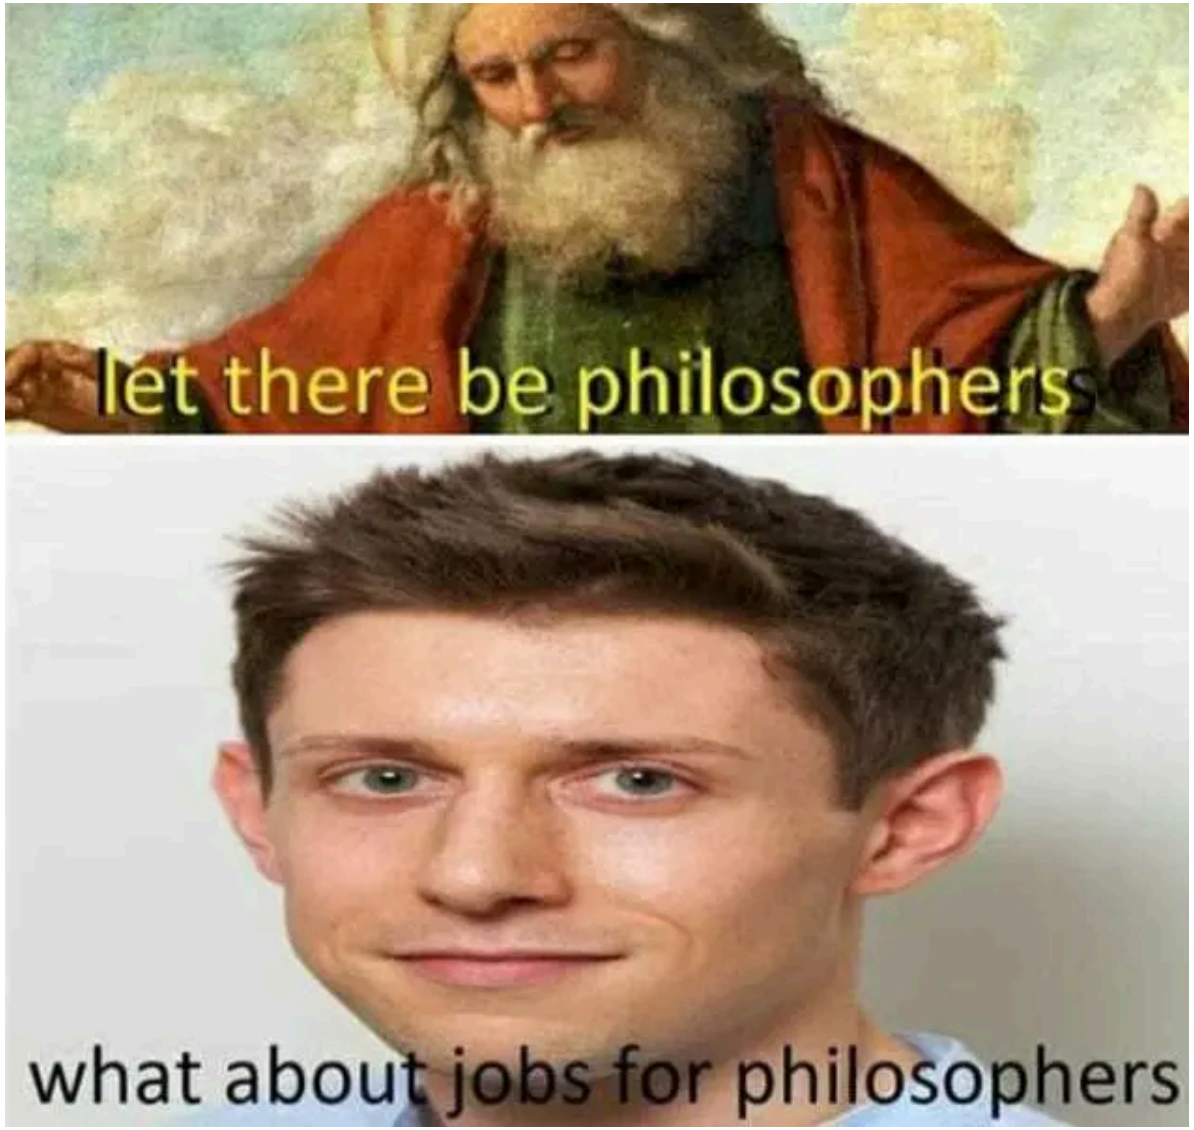

Concepts (or definitions) exist even before they are named - thus naming and it relevance for the terminology field have been neglected."

Ludwik Zamenhof (1859 - 1917)

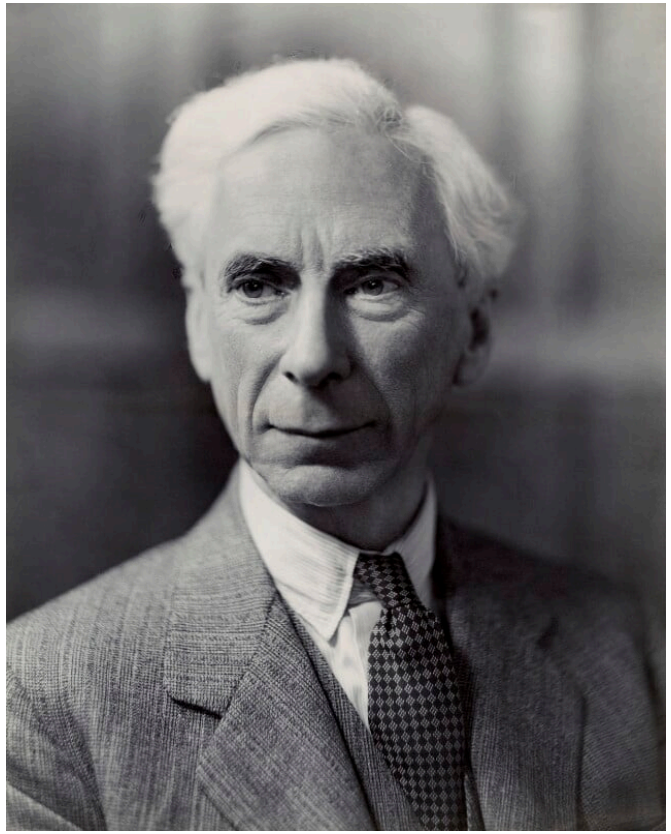

Wüster was a staunch advocate of a single language for scientific and technical communication.

Philosophy of definitions

Bertrand Russell (1872 - 1970)

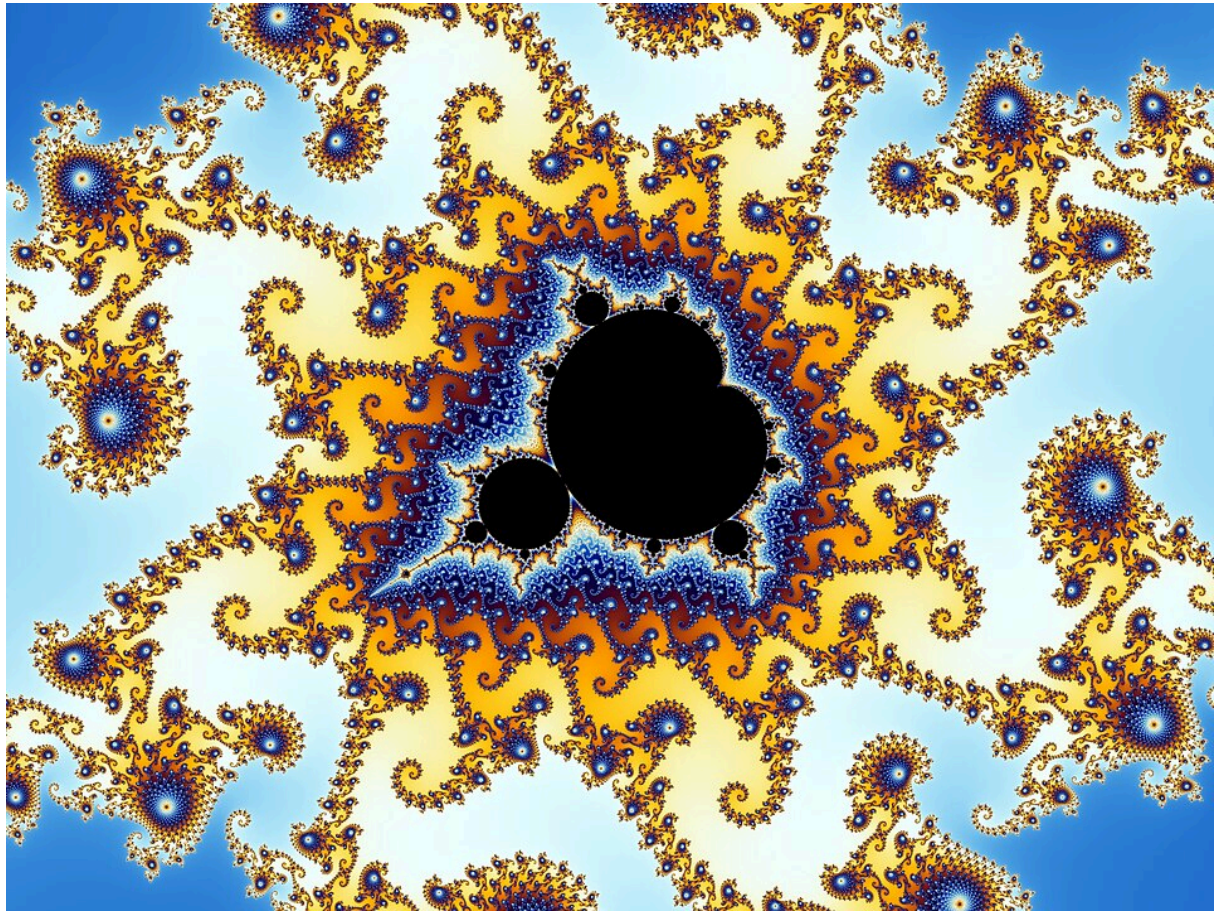

In 1950, Russell was awarded the Nobel Prize in Literature "in recognition of his varied and significant writings in which he champions humanitarian ideals and freedom of thought".

Logical atomism

The world is composed of independent, irreducible units of reality (logical atoms).

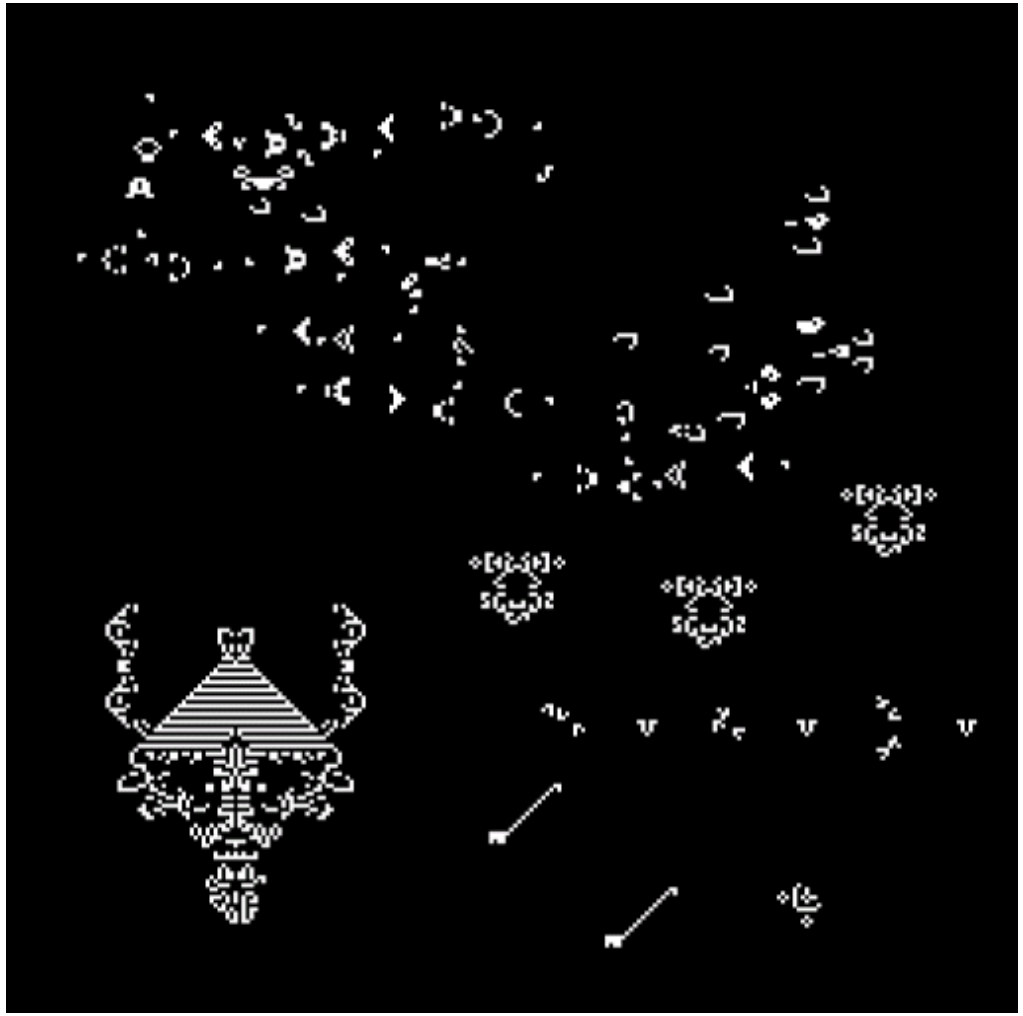

Benoit Mandelbrot (1924 - 2010)

Mandelbrot Set, being indisputably complex, uses a simple recursive equation:

$z_{n+1} = z_n^2 + c$, starting with $z_0 = 0$

John Conway (1937 - 2020)

Conway's Game of Life

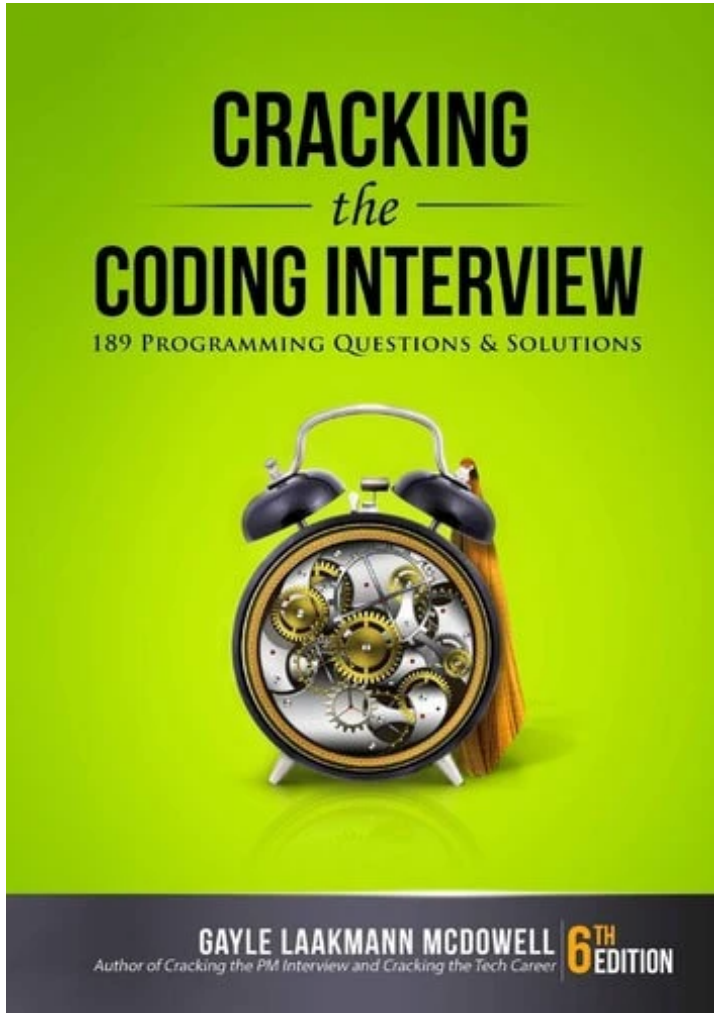

Mark Changizi (1969 - ?)

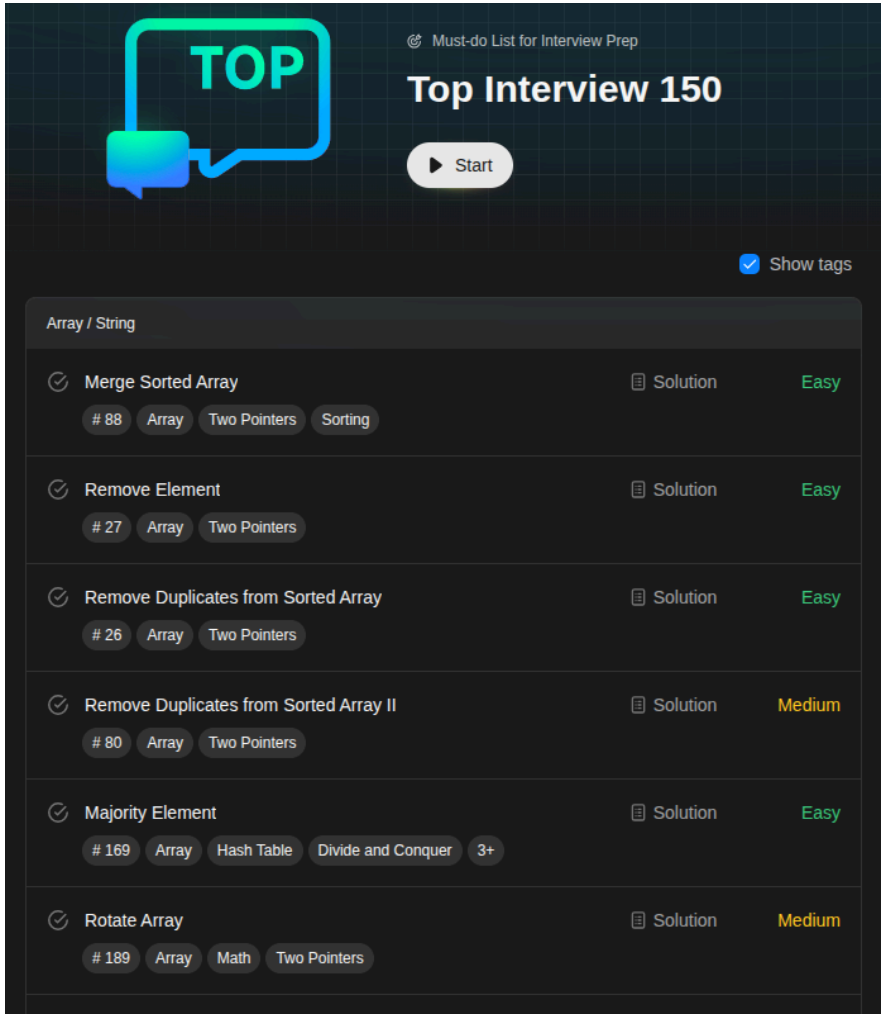

Organized hierarchies in Dictionaries

Data Structures and Algorithms course

How it was created

Transform the content of a book or a course into DefinIT format.

DefinIT format

Statistics

Issues

Further work

[MUST HAVE] Write a paper

[NICE TO HAVE] Create the next course

[NICE TO HAVE] Other applications

Food for LLMs - maybe finetuning?

[NICE TO HAVE] Other applications

New kind of science -> reducing the number of books/articles

Please generate a thank you slide for the audience. Don't make a mistake.
